

DESCRIPTION OF THE PRODUCT

What is **Mobile+** ?

- **Mobile+** is a tablet, a touch sensitive device fitted with the latest technology:
gorrilla glass with high screen resolution, Wifi-802.11n, Bluetooth 4.0, mini-usb, mini-hdmi, 3G/4G, LTE, CDMA, HSDPA, GSM, WCDMA, and yes also GPS functionality.

*What differentiates **Mobile+** from the others is not any of those features listed above.*

- It includes a docking area for your mobile phone (apple, android, blackberry and even some generic phones). Once docked, **Mobile+** can be used as an input device for your phone; it also allows the phone to be charged while docked.

Rights Reserved

- It includes 20GB, 40GB, 60GB or 120GB SSD internal storage; if that's still not enough, SDXC up to 256GB.
- It includes a 180-degree rotating 39MP camera that lets you take very high resolution pictures. A 50X Zoom Video technology lets you record videos of scenes as far as 1/2 mile away. In addition, with added infrared technology, you are able to snap pictures or record videos even in the dark.
- We also equip **Mobile+** with a high power scanner and inkless technology, making it a snap to print, scan, fax anywhere; on the plane, on the train, at the golf course or even at the beach.

In Addition

- If you ever feel nostalgic about a physical keyboard, one is made available, just for **Mobile+**; this is no ordinary keyboard; it charges **Mobile+** while docked even if no electrical outlet is available. In addition, the keyboard is fitted with permanent storage area that can be used either as a secondary storage for **Mobile+** or simply to mirror the information in **Mobile+**. If configured, the keyboard can use any connection to upload your information into an online storage area. If you like automated tasks, at the touch of a button, you can record every keystroke, save to a file and configure to be replayed any time you wish to perform the same task.
- With all those features and functionalities, **Mobile+** weighs less than two pounds. We call it *The Mobile Office* no one should ever be without, ever again.

Security is Priority

With that much information stored in such a sophisticated device, we integrate a level of security that makes leaving **Mobile+** unattended not a problem. Using your index finger and placing it anywhere in the touch sensitive area along with a Username and a **STRONG** password and a random 4-digit number sent to your cellphone, **Mobile+** can only be unlocked by you after you've configured it.

If stolen, after three unsuccessful attempts to unlock **Mobile+**, a series of events is triggered: **a)** the camera will automatically rotate towards the user and lock in that position **b)** rapid successions of pictures of the user will be taken **c)** those pictures will be automatically uploaded into our server and sent to your email address **d)** all ports in the device are completely disabled to prevent side-entry **e)** **Mobile+** will be automatically turned off and cannot be turned back on for at least one (1) hour. When turned back on, the user is given one last opportunity to unlock it; failure would require the user to call a number (displayed on the screen) to unlock **Mobile+**.

Features @A Glance

Remark: In Faxing, Printing & Scanning, we isolate those activities to preserve Mobile+ performance in par with the competition. In other words, those extra functionalities do not impact the device performance.

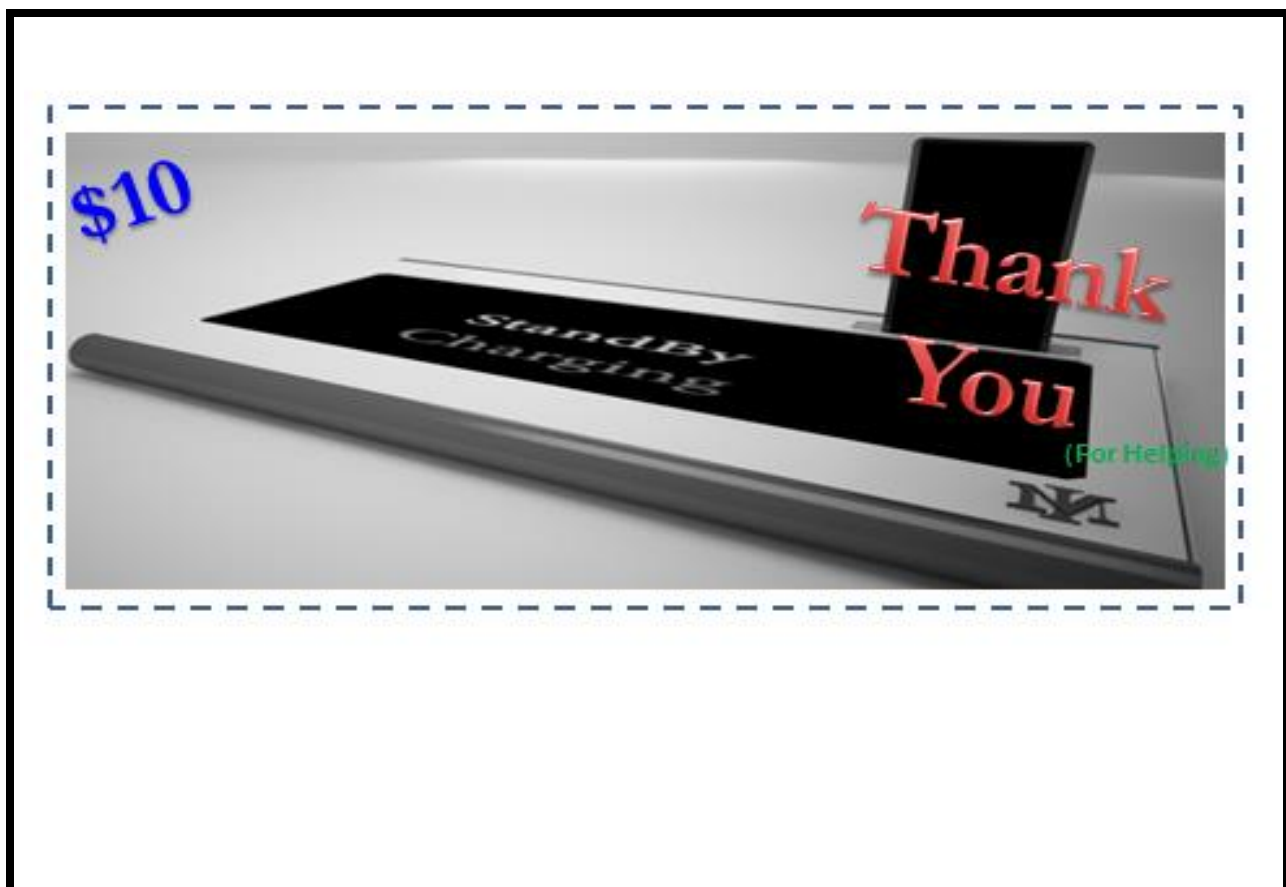

Bluetooth		At manufacturing time, Mobile+ will be fitted with the latest Bluetooth technology available. As you may already be aware, 4.0 is already being implemented in new devices. We are watching this technology closely to integrate the latest into Mobile+
Wifi		One of the best things that has happened to communication. At InterNotes Mobile, we're all about "Cutting the Cord". Already in use is 802.11n. Don't worry if those numbers don't ring any bell. Suffice to know that 802.11n gives your Wifi device a much longer range of communication with the source. We are watching this technology closely to integrate the latest into Mobile+

3G/4G/LTE		Look to your cellphone provider for guidance on this. This is one aspect of communication we have no say on. We simply integrate it into Mobile+.
Faxing		We don't have to explain faxing to you. One neat thing about using Mobile+ to fax is how original it looks to the recipient; no more ink smudge, missing word or letter. Your clients and customers will love receiving faxes from you. Remind them you are using Mobile+
Printing		We don't have to explain printing to you. Well, we do. We integrate into Mobile+ inkless technology that enables printing without the fuss; no more running out of ink, no more paper jam (the possibility of that happening is 1 in a million).
Scanning		We don't have to explain scanning to you, except that we place the scanner near the exit point, making it virtually impossible to have any issue.
Camera/Video		Camera, Light, Action or is it the other way around. Whichever you decide, you'll find snapping pictures with a 39MP camera one of the best experience of your photographic career. And if you're into video, you can keep your distance and still get in on the action. When you turn the video feature ON, no event is too far. Your eyes may not catch the details, our camera will. In those times when you wish you could be close enough to capture a crime in progress, Mobile+ will come to the rescue. How about spying on your boyfriend? Well, we are completely against that. Hmm!
Security		Everyone mentions security as a priority; well, we don't simply mention it. We implement it. There is no upside for anyone to steal your Mobile+. Once the security is active, no one can make use of your tablet. Even at the point when a phone number is provided to call to have Mobile+ unlocked, the "thief" would also need your personal code (generated at time of shipment) sent to you with the product. Unless it's someone who just wants to piss you off, a girlfriend maybe. Hmm!
Display		We are looking at 260ppi (a resolution close to that of iPad 3 which is 264ppi) as of this writing but things can change. The final determination will be made at time of manufacturing of course,

Ports		Well, ports are ports. Mobile+ sports mini-USB, mini-HDMI, audio, video and any other port that may be deemed necessary at time of manufacturing. As usual, those ports will be compatible with the latest technology

Your help is needed to reach our goal; any contribution is appreciated and gets us closer to reach the goal. **Keep in mind that any contribution of \$50 or more can be used towards the purchase of a Mobile+ tablet when it's available.**

REWARDS:

ELIGIBLE FOR A FREE MOBILE+ TABLET
(See **YOUR HELP IS NEEDED** section below for details)

\$150 Thank You

Your Name Is Displayed In the Annals of Mobile+ History & Posted on our Site

Are Connected Charging?
Yes

ELIGIBLE FOR A FREE MOBILE+ TABLET
(See **YOUR HELP IS NEEDED** section below for details)

\$299

\$300 coupon applied

(Weeks 1 & 2 Only)

(9/14 – 9/27)

Early Bird Special

\$399

\$200 coupon applied

(Weeks 3 & 4 Only)

(9/28 - 10/11)

Day Break Special

\$499

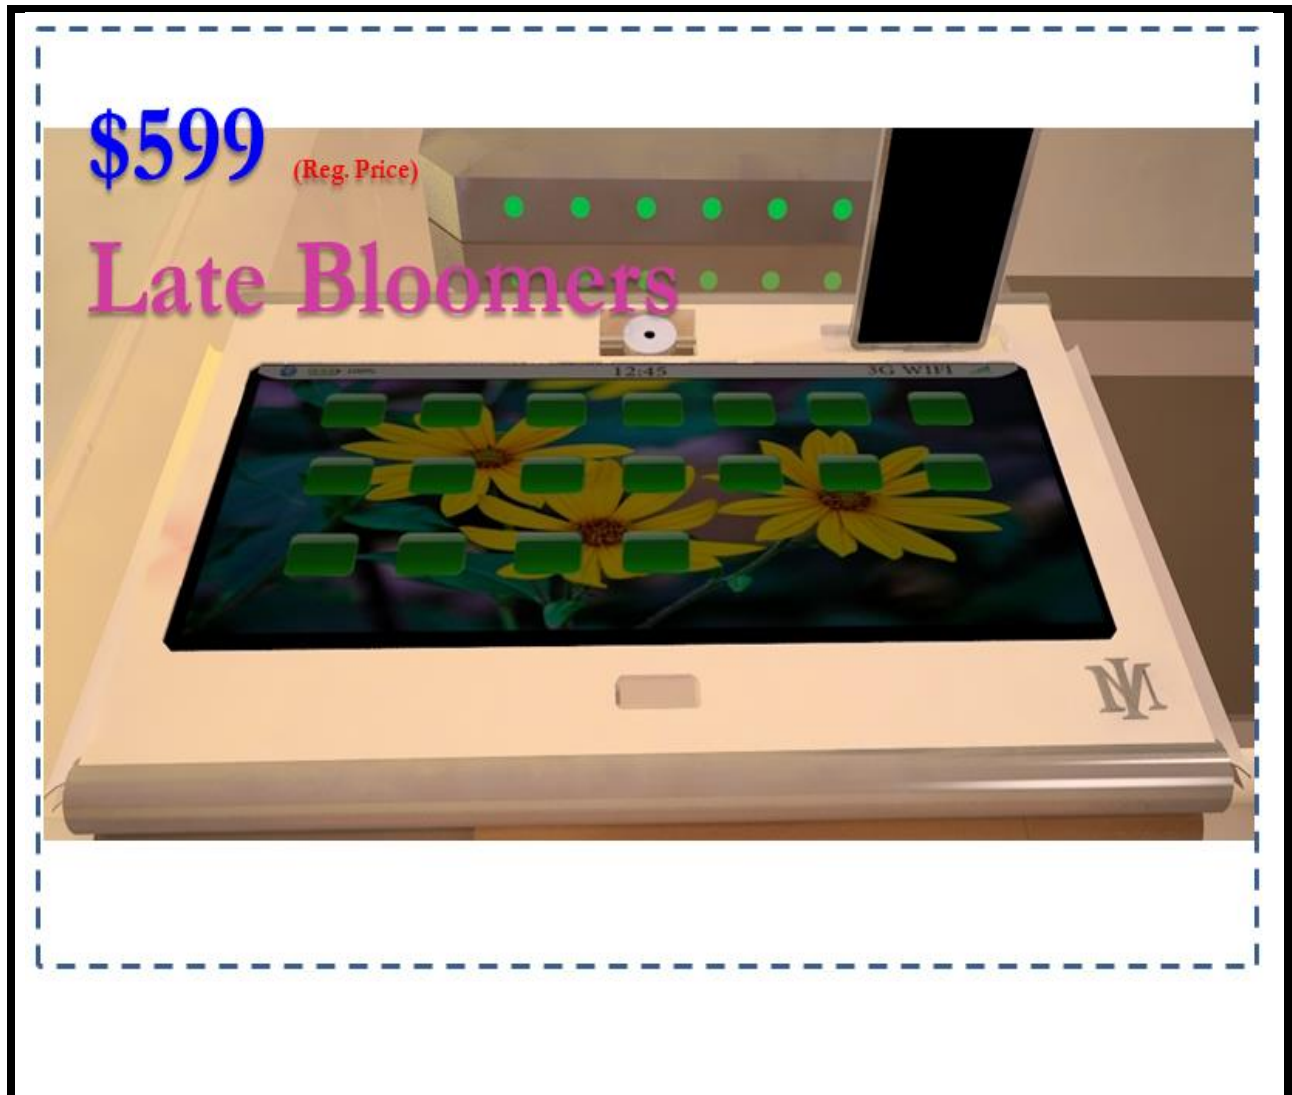

\$100 coupon applied

(Weeks 5 & 6 Only)

(10/12 - 10/25)

Night Fall Special

REMARK:

During the campaign, you are also encouraged to submit your suggestions for **Mobile+** device; you can do it here on this site or submit directly to [InterNotes Mobile](#) site. As we finalize the schematic, improvement and/or addition may still make way into the final product. Please, don't be shy sharing your ideas.

UPDATE:

As of the time this document is uploaded into the site, there is only one color (silver) **Mobile+** comes in. Other colors will of course be considered at manufacturing time.

HOW DID IT START?

One night, I went to bed thinking that I needed to contribute a little bit more to society. In a vision that night, God spoke to me:

God: Michael, Michael

Me: Yes Lord

God: I chose you to lead the world into the technology future

Me: Me Lord?

God: Yes Michael, you.

Me: What do I do?

God: Michael, use your imagination

And I woke up.

Of course I am kidding.

I do a lot of technology consulting; translation, I travel a lot. I cannot begin to quantify how many times I found myself in a situation when I either needed to print a page document to be signed by a client or scan a document to be immediately sent to headquarters for review and approval.

Those situations were not isolated or rare. So, I began to think of a more practical solution to my problem. I lost a few contracts because I couldn't obtain a client's signature on the spot. By the time I'd traveled back to the office, the client had already changed his mind about the deal. Other times, the client would want so many changes that would warrant a brand new meeting which didn't always go my way.

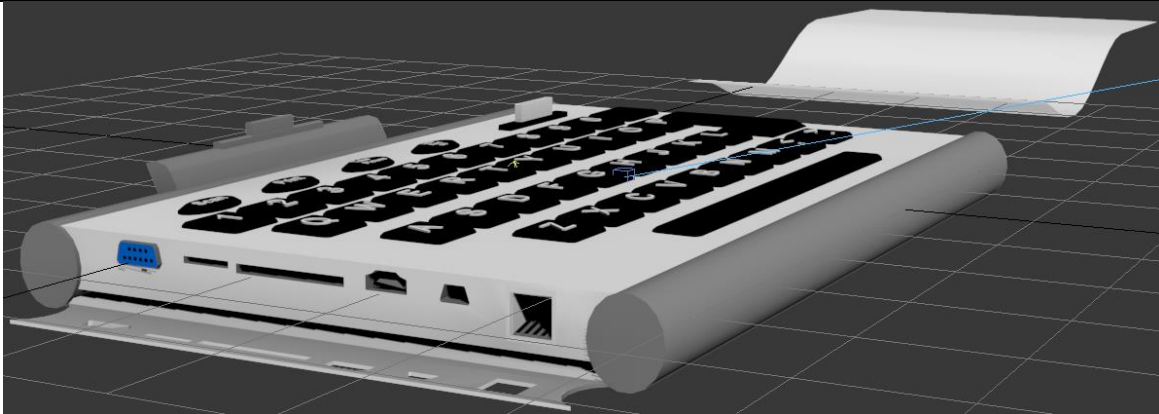

Most of those meetings happened outside the office, at a restaurant, at a concert, at the airport and even at the park. Try to bring a printer there, or a fax. As it is probably obvious, there were times when it was the client that would hand me a document that was already drafted that I had to sign, in which case I would need to send a copy immediately to my superior at the headquarters. Try finding a fax at a restaurant or anywhere nearby while having dinner.

The solution was simple, to carry those basic office equipment with me. I christened it *Mobile Office*. Think about it. What do we do mostly at the office? Print, Scan, Fax, Email, Calls and Meetings, right? So, Mobile Office (Mobile+) handles the printing, the scanning, the faxing and

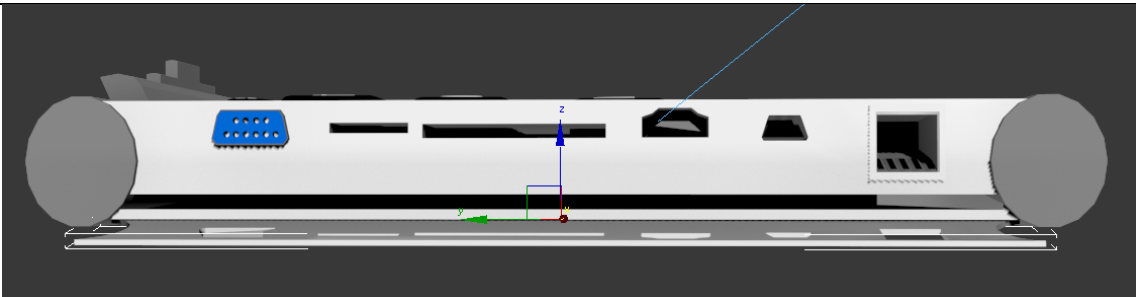

the emailing. It can even handle some of the calling, using a headset; it's fitted with GSM, CDMA, LTE, WiFi. With a Skype account, a Wifi connection and a headset (if you want privacy; otherwise, the speaker is perfect to use), you can start making calls the day you receive Mobile+. As far as the meetings aspect of the office, I need to have another dialog with God.

Below, the first image is what **Mobile+** looked like when first conceived, bulky, heavy. Time has changed; and of course today, the second image is rather contemporary.

THE PRODUCT

Below is an image of the current schematic; for obvious reasons, a number of proprietary placements of circuitry and labeling are blocked. Later in this document, there is a timeline of activities regarding the concept, the patent application, the schematics and the expected date of completion of **Mobile+**.

Mobile+ Internal Circuitry

WHERE DO WE GO FROM HERE?

We are very anxious to get **Mobile+** completed and introduced to the market; we have already taken a number of steps to make that happen:

- **May 2012:** InterNotes Mobile applied for and was granted a provisional patent (EFS ID: 12900728; Application No: 61653525; Confirmation No: 9840)
- **May 2012:** InterNotes Mobile applied for a tax ID with US Internal Revenue Service; tax ID was issued (EIN: 45-5388174)
- **June 2013:** Filing with New York (NY) Department of State for Certificate of Corporation; one (1) billion shares registered along with the filing. NY State approved InterNotes Mobile request for Corporation status in the state of NY (DOS ID: 4377538)
- **Ongoing:** Schematic Update, Improvement, Change, Substitution. This is where most of the time is being spent to bring scanning, printing & faxing to Mobile+ without extra weight or loss in performance.

- **Ongoing:** Negotiation with Manufacturer; we take a one-stop shopping approach to minimize delay, problems and cost. The manufacturer tasked to complete the prototype is also responsible for manufacturing; in addition, the manufacturer is tasked to handle procurement of raw materials and any components necessary to build Mobile+
- **TBD:** Upon final schematic, a new provisional patent will be filed to reflect the final drawings as well as the look of Mobile+
- **TBD:** Upon final schematic, certification with FCC
- **Jan-Feb 2015:** Finalize Schematic
- **March 2015:** Working prototype; corrections, improvements, changes, etc..
- **April 2015:** Fully working Prototype
- **May-June 2015:** Working model
- **July-Sept 2015:** FULL testing of all components and functionalities
- **October 2015:** Preparation for production and other miscellaneous
- **Oct-Nov 2015:** Production begins
- **Nov-Dec 2015:** Shipment begins

Great Plan, would it work?

I am a very optimistic individual; I am most inclined to believe that if one plans properly, most everything should work. I am not however naïve to ignore problems that could creep in sometimes. We are prepared to deal with those unfortunate situations. The one promise we have vowed to keep is NOT to release a “half-baked” product. It is frustrating sometimes that a promised date is not met; it is however most frustrating if the promised product does not live up to its hype.

To minimize delays, we have carefully selected the manufacturer that will handle all aspects of production. I will personally monitor the manufacturer’s activity to be abreast of any problem and address it promptly. You will be kept abreast as well; we are working the logistics to update all interested parties either on a weekly or bi-weekly basis.

Having said all that, we are fully committed to abide by the aforementioned dates

YOUR HELP IS NEEDED

When you pledge \$10 or more, you help us get one step closer to our goal. **Mobile+** is no ordinary tablet. Be the first to own one.

We appreciate any contribution that will help get us closer to our goal. As a gesture of gratitude for helping us get there, we have a number of incentives, in addition to the REWARDS earlier:

Incentive 1

If you make a contribution of \$50, you are automatically ELIGIBLE to receive a free Mobile+ tablet when it becomes available, and it is easy to get.

- Tell your friends (on Facebook, Twitter, Instagram or any social network) about Mobile+
- For each of your friends that makes a contribution towards our goal (whether it's a \$10 contribution or the purchase of Mobile+), [claim a \\$10 coupon from InterNotes Mobile](#). Collect enough coupons to cover the Regular Mobile+ price and receive a free Mobile+ tablet

Note: the friends you refer MUST NOT be a current backer for this project; you are encouraged to claim your coupon as soon as your friend makes a contribution.

Remark: your contribution is applied towards the Regular Price of Mobile+

Incentive 2

If you make a contribution of \$100, you are automatically ELIGIBLE to receive a free Mobile+ tablet when it becomes available, and it is easy to get.

- Tell your friends (on Facebook, Twitter, Instagram or any social network) about Mobile+
- For each of your friends that makes a contribution towards our goal (whether it's a \$10 contribution or the purchase of Mobile+), [claim a \\$25 coupon from InterNotes Mobile](#). Collect enough coupons to cover the Regular Mobile+ price and receive a free Mobile+

Note: the friends you refer MUST NOT be a current backer for this project

Remark: your contribution is applied towards the Regular Price of Mobile+

Incentive 3

If you make a contribution of \$150, you are automatically ELIGIBLE to receive a free Mobile+ tablet when it becomes available, and it is easy to get.

- Tell your friends (on Facebook, Twitter, Instagram or any social network) about Mobile+
- For each of your friends that makes a contribution towards our goal (whether it's a \$10 contribution or the purchase of Mobile+), [claim a \\$50 coupon from InterNotes Mobile](#). Collect enough coupons to cover the Regular Mobile+ price and receive a free Mobile+

Note: the friends you refer MUST NOT be a current backer for this project

Remark: your contribution is applied towards the Regular Price of Mobile+

FAQ

Remark: although I preferred to be contacted via email (mducheiney@gmail.com), I would entertain chat on Google (mducheiney) or Skype (mducheine) or Yahoo (mducheiney).

This space will be used to provide answers to questions that would benefit all interested parties
